

GIS INTERNSHIP REPORT

Name: Ladage Pooja Mahavir.

Course: MSc.1 Geoinformatics.

Institute: Shivaji university Kolhapur.

Internship Organization: Sigma Infraplan Engineering Pvt.Lim.

Duration: 12/05/2025 To 12/06/2025

Introduction: -

The Geographic Information System (GIS) is a powerful tool for spatial data analysis, visualization, and mapping that supports decision-making across numerous disciplines including urban planning, environmental science, disaster management, and resource monitoring.

As a part of my academic curriculum, I completed a GIS internship at Sigma Infraplan Engineering Pvt.Lim. This report outlines my learning, experiences, and contributions during the internship, which lasted from 12 May 2025 to 12 June 2025.

The main objectives of this internship were:

- To gain practical knowledge of GIS applications
- To work with spatial datasets and remote sensing imagery
- To contribute to ongoing projects by creating and analysing thematic maps.

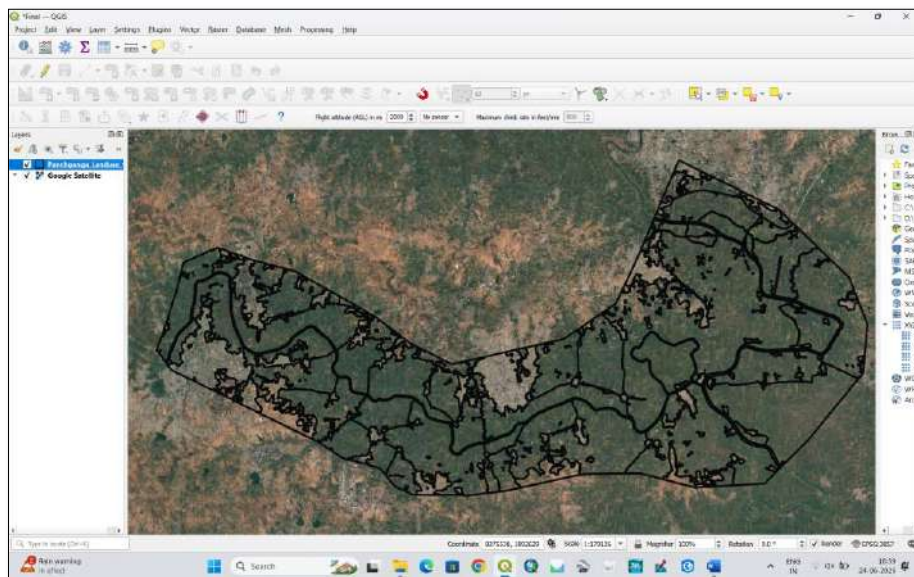

Internship Tasks and Responsibilities: -

During the internship, I was assigned several tasks that provided hands-on experience in using GIS tools and processing spatial data. The primary responsibilities included.

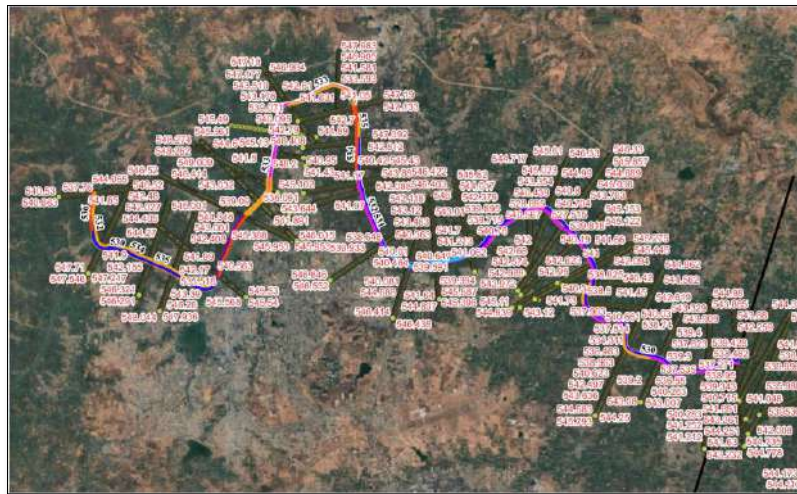

Task1: Write a not of All raster interpolation technics in QGIS.

Contents	List of Figures
TYPES OF INTERPOLATION:	Figure 1: IDW Interpolation
1 Inverse Distance Weighting (IDW)	Figure 2: Values of IDW
2 Triangulated Irregular Network (TIN)	Figure 3: TIN Interpolation
3 Kriging Interpolation	Figure 4: Ordinary Kriging
3.1 Ordinary Kriging:	Figure 5: Universal Kriging
3.2 Universal Kriging (UK)	Figure 6: Simple Kriging
3.3 Simple Kriging:	Figure 7: Regression campor with TIN
3.4 Regression Kriging:	Figure 8: Regression campor with B-spline approximation
3.4.1 TIN_1_Pixel_size:	Figure 9: Regression campor with interpolation (cubic line)
3.4.2 B-spline approximation:	Figure 10: Regression campor with Multilevel B-spline for category
3.4.3 Interpolation (cubic Spline)	Figure 11: Regression campor with Multilevel B-spline
3.4.4 Multilevel B-spline for category	Figure 12: Regression campor with Nearest Neighbour
3.4.5 Multilevel B-spline	Figure 13: Regression campor with Natural Neighbour
3.4.6 Nearest Neighbor	Figure 14: Natural Neighbourhood
3.4.7 Natural Neighbour	Figure 15: 1. Comparison with TIN and Natural Neighbourhood
4 Natural Neighbourhood	Figure 16: 2. Comparison with TIN and Natural Neighbourhood
5 Nearest neighbour	Figure 17: Nearest neighbour
6 Plate Spline Interpolation (Thin Plate Spline)	Figure 18: 1. Comparison with Nearest neighbour and Natural Neighbourhood
6.1 B-spline approximation:	Figure 19: 2. Comparison with Nearest neighbour and Natural Neighbourhood
6.2 Interpolate (Cubic spline)	Figure 20: Thin Plate Spline
6.3 Multilevel b-spline:	Figure 21: B-spline approximation
6.4 Multilevel b-spline for category	Figure 22: B-spline approximation values
6.5 Multilevel b-spline from grid	Figure 23: Interpolation(cubic spline)
	Figure 24: Compare with TIN and cubic spline
	Figure 25: Compare with TIN and Multilevel B-spline
	Figure 26: Multilevel B-spline

Task 2: Land use Land cover on part of Panchgnga river.

Task 3: Mack contour lines in the Panchgnga river and surrounding areas from the given contour points.

Learning Outcomes: -

The internship allowed me to bridge the gap between theoretical knowledge and practical GIS skills. Key learnings include:

- Understanding spatial data formats (raster vs vector).
- Skill in digitizing maps and generating attribute data.
- Experience in satellite image interpretation and classification.
- Ability to analyse and visualize spatial phenomena.
- Improved technical documentation and map design skills.

Conclusion: -

The GIS internship at Sigma Infraplan Engineering Pvt.Lim. was a valuable and enriching experience. It helped me understand real-world applications of GIS and improved my technical as well as analytical skills. I gained hands-on experience with GIS tools, spatial data handling, and map making, which will benefit me in future academic and professional work.

I am thankful to the team at Sigma Infraplan Engineering Pvt.Lim. for their support, guidance, and the opportunity to learn. This internship has strengthened my interest in pursuing a career in GIS and spatial analysis.
