TECHNICAL SKILLS

- **GIS & RS Software:** ArcGIS, QGIS, ERDAS, HEC-RAS
- **Surveying & Photogrammetry:** Pix4D, Agisoft, GPS, DGPS
- **Geospatial Programming:** Python, ArcPy, SQL (Basic)
- **Core Competencies:** Flood Mapping, Drought Monitoring, Site Suitability

EXPERIENCE

GIS Intern | Sigma Infraplan Engineering Pvt. Ltd. May 2025 – July 2025

- Generated topographical contours for river utilizing cross-sectional data to support hydrological modeling.
- Digitized spatial features using GIS software, including the creation of comprehensive Land Use/Land Cover (LULC) maps.

RELEVANT PROJECTS

- **Flood Plain Mapping & Risk Assessment (Krishna River):** Performed 1-D steady flow simulation using HEC-RAS to map flood inundation and developed an AHP-based Flood Risk Map identifying high-risk zones.
- **Integrated Drought Assessment Engine (Northern Latur):** Processed 12 years of Landsat imagery to engineer a Composite Drought Hazard Index (CDHI) to monitor agricultural stress.
- **Agriculture Planning & Human Development:** Conducted a socio-economic assessment of agricultural patterns to correlate crop planning strategies with human development indicators.
- **Morphometric Analysis & Sub-watershed Prioritization (Ghataprabha Basin):** Processed SRTM 30m DEM using ArcSWAT and ArcGIS Pro to delineate 15 sub-watersheds, calculating spatial parameters to prioritize highly vulnerable zones for targeted conservation.

EDUCATION

- M.Sc. in Geography | Shivaji University, Kolhapur | 2022 – 2024
- M.Sc. in Geoinformatics | Shivaji University, Kolhapur | 2024 – 2026
